| Maximum Marks | 10 Marks |

Model Performance Testing:

| S.No | Parameter | Values | Screenshot |
|------|---------------|---|--|
| 1. | Model Summary | <p>The user interacts with the chatbot and chooses from a list of frequently asked questions by banking customers. A single chatbot may ask different users at different times in different scenarios. When a consumer asks a question that is regularly asked, the chatbot will rapidly react with the expected response. The chatbot includes responses to questions about any feature or service the bank offers..</p> |   |

| | | | |
|----|----------|---|--|
| | | |   |
| 2. | Accuracy | <p>Training Accuracy – 100%</p> <p>Validation Accuracy – 100%</p> |  |
